Parental Consent Form for Preschool Toothbrushing Programme

Dear Parent,

The Irish Dental Hygienists Association and Early Childhood Ireland have collaborated to provide support and guidance for children and educators in bringing toothbrushing routines into the daily practice of early childhood settings.

This free programme will be rolled out to early childhood settings and will include supportive information and resources, including a toothbrush and fluoride toothpaste for each child.

Following a short training program, educators will support children when they brush their teeth in settings. A dental hygienist will implement the toothbrushing programme in the early years setting in a fun and interactive way. These dental hygienists are specifically trained to deliver this programme.

If you have any questions or would like more information, please do not hesitate to contact the early childhood setting.
